The Australian Acoustical Society (AAS) and the International Institute of Noise Control Engineering (I-INCE) invite you to Adelaide, for the 55th International Congress and Exposition on Noise Control Engineering - INTER-NOISE 2026.

Take this unique opportunity to participate in an international event, held in one of Australia's and the World's most liveable cities.

The congress will include technical sessions covering all typical and more contemporary topics in noise control engineering, acoustics and vibration, as well as technical site visits and tours, a young professional program and women in noise control engineering events.

We will leave you with plenty of time to network with colleagues and to meet new collaborators.

A full technical exhibition will be held, allowing demonstration and discussion of some of the latest products and services applicable to all areas of noise control engineering, acoustics and vibration.

Accompanying delegates will have the opportunity to enjoy some of Adelaide's premier attractions. The timing of the congress also provides an excellent opportunity to tour the region and other destinations across Australia before or after the congress.

CALL FOR PAPERS

Accepted abstracts will be included in Congress proceedings online and in print.

Subsequently submitted and accepted papers will be included in the I-INCE USA Digital Library.
